

# City of Frisco Takes Home the 2018 John Teipel Award for Environmental Excellence

Every year, the Texas Chapter for the American Public Works Association recognizes outstanding and meritorious achievement in the environmental field. This may include projects related to street sanitation, refuse collection, disposal and recycling, sewers and sewage treatment, water supply, and water treatment.

In 2018, the TxAPWA recognized the City of Frisco Reuse Water Project at the Star Facility. By using reuse water for irrigation, the Star is able to adhere to NFL turf standards while saving the municipal drinking water system millions of gallons of water.

The City of Frisco would like to thank the Cowboys and Freese & Nicholes for their cooperation and dedication to making this social aware and environmentally conscientious project a success.
