Technical Report for

Southwest Geoscience

0111C278A/ SC Sediment Sampling

Accutest Job Number: TC32298

Report to:

Southwest Geoscience 2351 W. Northwest Highway Suite 3321 Dallas, TX 75220 jason.minter@southwestgeoscience.com; rusty.simpson@southwestgeoscience.com

ATTN: Jason Minter

Total number of pages in report: 38

Test results contained within this data package meet the requirements of the National Environmental Laboratory Accreditation Conference and/or state specific certification programs as applicable.

Client Service contact: Sylvia Garza 713-271-4700

Certifications: TX (T104704220-13-10) AR (12-029-0) AZ (AZ0769) FL (E87628) KS (E-10366) LA (85695/04004) OK (2012-059)

This report shall not be reproduced, except in its entirety, without the written approval of Accutest Laboratories. Test results relate only to samples analyzed.

Sample Summary

Southwest Geoscience

Job No: TC32298

0111C278A/ SC Sediment Sampling

Sample Number	Collected Date	Time By	Received	Matr Code		Client Sample ID
TC32298-1	06/12/13	13:36	06/15/13	SO	Soil	SC-SED-31
TC32298-2	06/12/13	13:39	06/15/13	SO	Soil	SC-SED-32
TC32298-3	06/12/13	13:42	06/15/13	SO	Soil	SC-SED-33
TC32298-4	06/12/13	14:06	06/15/13	SO	Soil	SC-SED-34
TC32298-5	06/12/13	14:09	06/15/13	SO	Soil	SC-SED-35
TC32298-6	06/12/13	14:13	06/15/13	SO	Soil	SC-SED-36
TC32298-7	06/12/13	14:37	06/15/13	SO	Soil	SC-SED-37
TC32298-8	06/12/13	14:41	06/15/13	SO	Soil	SC-SED-38
TC32298-9	06/12/13	14:44	06/15/13	SO	Soil	SC-SED-39
TC32298-10	06/12/13	15:06	06/15/13	SO	Soil	SC-SED-40

Soil samples reported on a dry weight basis unless otherwise indicated on result page.

TC32298

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client:	Southwest Geoscience	Job No	TC32298
Site:	0111C278A/ SC Sediment Sampling	Report Date	7/3/2013 5:04:19 PM

10 Samples were collected on 06/12/2013 and were received intact at Accutest on 06/15/2013 and properly preserved in 1 cooler at 2 Deg C These Samples received an Accutest job number of TC32298. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Wet Chemistry By Method ASTM D422-63

Matrix SO	Batch ID: N:GP72913	

Analysis performed at Accutest Laboratories, Dayton, NJ.

Accutest Laboratories Gulf Coast (ALGC) certifies that this report meets the project requirements for analytical data produced for the samples as received at ALGC and as stated on the COC. ALGC certifies that the data meets the Data QualityObjectives for precision, accuracy and completeness as specified in the ALGC Quality Manual except as noted above. This report is to be used in its entirety. ALGC is not responsible for any assumptions of data quality if partial data packages are used

CASE NARRATIVE / CONFORMANCE SUMMARY

Client:	Accutest Laboratories Gulf Coast, Inc.	Job No	TC32298
Site:	SGTXD: 0111C278A/ SC Sediment Sampling	Report Date	7/2/2013 8:13:50 AM

On 06/20/2013, 10 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories at a temperature of 3.5 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of TC32298 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Wet Chemistry By Method ASTM D422-63

Matrix: SO	Batch ID:	GP72913
Sample(s) TC32298-10DUP were us	sed as the QC samples	s for % Gravel, % Sand, % Silt, Clay, Colloids, 0.0015 mm
(Hydrometer), 0.005 mm (Hydrometer	er), 0.030 mm (Hydro	meter), 0.375 Inch Sieve, 0.75 inch sieve, 1.5 Inch Sieve, 3 inch sieve,
No.10 Sieve (2.00 mm), No.100 Siev	e (0.15 mm), No.16 S	Sieve (1.18 mm), No.200 Sieve (0.075 mm), No.30 Sieve (0.60 mm),
No.4 Sieve (4.75 mm), No.50 Sieve (0.30 mm), No.8 Siev	e (2.36 mm).

- TC32298-9 for 0.030 mm (Hydrometer): Data extrapolated from higher and lower data points due to possible analytical problem with hydrometer analysis at short analysis times.
- TC32298-7 for 0.030 mm (Hydrometer): Data extrapolated from higher and lower data points due to possible analytical problem with hydrometer analysis at short analysis times.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

Laboratory Data Package Cover Page Appendix A

This signature page, the laboratory review sheeklist, and the following reportable date

TC32298 This data package consists of

Ļ	This sig	nature page, the laboratory review	checklist, and the following reportable data:
Ū.	R1	Field chain-of-custody docume	ntation;
Ū.	R2	Sample identification cross-refe	erence;
Ū.	R3	Test reports (analytical data she	eets) for each environmental sample that includes:
		a)	Items consistent with NELAC 5.13 or ISO/IEC 17025 Section 5.10
		b)	dilution factors,
		c)	preparation methods,
		d)	cleanup methods, and
		e)	if required for the project, tentatively identified compounds (TICs).
Ū.	R4	Surrogate recovery data includi	ing:
		a)	Calculated recovery (%R), and
		b)	The laboratory's surrogate QC limits.
_	R5	Test reports/summary forms for	r blank samples;
	R6	Test reports/summary forms for	r laboratory control samples (LCSs) including:
		a)	LCS spiking amounts,
		b)	Calculated %R for each analyte, and
		c)	The laboratory's LCS QC limits.
Ģ	R7	Test reports for project matrix s	pike/matrix spike duplicates (MS/MSDs) including:
		a)	Samples associated with the MS/MSD clearly identified,
		b)	MS/MSD spiking amounts,
		c)	Concentration of each MS/MSD analyte measured in the parent and
		d)	Calculated %Rs and relative percent differences (RPDs), and
		e)	The laboratory's MS/MSD QC limits
Ū.	R8	Laboratory analytical duplicate	(if applicable) recovery and precision:
		a)	The amount of analyte measured in the duplicate,
		b)	The calculated RPD, and
		c)	The laboratory's QC limits for analytical duplicates.
Ū.	R9	•	ts (MQLs) and detectability check sample results for each analyte for each
	R10	Other problems or anomalies.	

The Exception Report for each "No" or "Not Reviewed (NR)" item in Laboratory Review Checklist and for each analyte, matrix, and method for which the laboratory does not hold NELAC accreditation under the Texas Laboratory Accreditation Program.

Release Statement: I am responsible for the release of this laboratory data package. This laboratory is NELAC accredited under the Texas Laboratory Accreditation Program for all the methods, analytes, and matrices reported in this data package except as noted in the Exception Report. This data package has been reviewed by the laboratory and is complete and technically compliant with the requirements of the methods used, except where noted by the laboratory in the attached exception reports. By my signature below, I affirm to the best of my knowledge, all problems/anomalies, observed by the laboratory as having the potential to affect the quality of the data, have been identified by the laboratory in the Laboratory Review Checklist, and no information or data have been knowingly withheld.

Check, if applicable: This laboratory meets an exception under 30 TAC&25.6 and was last inspection by

[X] TCEQ or [] ______ on April 2011. Any findings affecting the data in this laboratory data package are noted in the Exception Reports herein. The official signing the cover page of the report in which these data are used is responsible for releasing this data package and is by signature affirming the above release statement is true.

ER# ¹	Descriptio	n									
	For reporting purposes, the MQL is defined in the report as the RL. The unadjusted MQL/RL is reported in the method										
1	blank. The	blank. The SDL is defined in the report as the MDL.									
	For reporting	or reporting purposes, the method blank represents the unadjusted MQL. The DCS is on file in the laboratory and is not									
2	included in	the laboratory data package.									
	The labora	tory is NELAC-accredited under the Te	exas Laboratory Accreditation Program for the	analytes, matrices, and							
3	methods as	ssociated with this laboratory data pac	kage for analytes that are listed in the Texas Fi	elds of Accreditation.							
4	All anomali	es are discussed in the case narrative									

1ER# = Exception Report identification number (an Exception Report should be completed for an item if "NR" or "No" is checked on

Appendix A Laboratory Data Package Cover Page

This data packages consists of: Х This signature page, the laboratory review checklist, and the following reportable data: Х Field chain-of-custody documentation; R1 Х R2 Sample identification cross-reference; Х Test reports (analytical data sheets) for each environmental sample that includes: R3 a) Items consistent with NELAC 5.13 or ISO/IEC 17025 Section 5.10 b) dilution factors. c) preparation methods, d) cleanup methods, and e) if required for the project, tentatively identified compounds (TICs). N/A R4 Surrogate recovery data including: a) Calculated recovery (%R), and b) The laboratory's surrogate QC limits. Test reports/summary forms for blank samples; Х R5 Х R6 Test reports/summary forms for laboratory control samples (LCSs) including: a) LCS spiking amounts, b) Calculated %R for each analyte, and c) The laboratory's LCS QC limits. Х **R**7 Test reports for project matrix spike/matrix spike duplicates (MS/MSDs) including: a) Samples associated with the MS/MSD clearly identified, b) MS/MSD spiking amounts, c) Concentration of each MS/MSD analyte measured in the parent and spiked samples, d) Calculated %Rs and relative percent differences (RPDs), and e) The laboratory's MS/MSD QC limits Х Laboratory analytical duplicate (if applicable) recovery and precision: **R**8 a) The amount of analyte measured in the duplicate,

- b) The calculated RPD, and
- c) The laboratory's QC limits for analytical duplicates.

X R9 List of method quantitation limits (MQLs) and detectability check sample results for each analyte for each method and matrix;

X R10 Other problems or anomalies.

The Exception Report for each "No" or "Not Reviewed (NR)" item in Laboratory Review Checklist and for each analyte, matrix, and method for which the laboratory does not hold NELAC accreditation under the Texas Laboratory Accreditation Program.

Release Statement: I am responsible for the release of this laboratory data package. This laboratory is NELAC accredited under the Texas Laboratory Accreditation Program for all the methods, analytes, and matrices reported in this data package except as noted in the Exception Report. This data package has been reviewed by the laboratory and is complete and technically compliant with the requirements of the methods used, except where noted by the laboratory in the attached exception reports. By my signature below, I affirm to the best of my knowledge, all problems/anomalies, observed by the laboratory as having the potential to affect the quality of the data, have been identified by the laboratory in the Laboratory Review Checklist, and no information or data have been knowingly withheld.

Check, if applicable: [] This laboratory meets an exception under 30 TAC&25.6 and was last inspected by [X] TCEQ or [] ______ on April 2011. Any findings affecting the data in this laboratory data package are noted in the Exception Reports herein. The official signing the cover page of the report in which these data are used is responsible for releasing this data package and is by signature affirming the above release statement is true.
