Austin, TX 78753

Reference: Revised Response Extension Request
TCEQ Response Letter dated September 8, 2015
VCP 2122
City of Frisco
Stewart Creek Waste Water Treatment Plant (SCWWTP)
Off Eagan Way
Frisco, TX
Apex Project No. 7020105C035

Dear Ms. Manning:

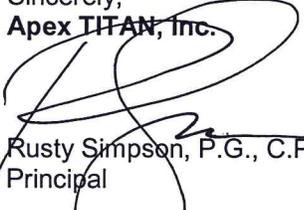

Apex TITAN, Inc. (Apex) (formerly Southwest Geoscience) appreciates the opportunity to submit this revised request for an extension to the deadline for submission of a revised Affected Property Assessment Report (APAR) and Response Action Completion Report (RACR) for the above-referenced Voluntary Cleanup Program (VCP) site located off Eagan Way, in Frisco, Texas (the "Site").

The groundwater to surface water pathway is currently being evaluated for the revised submittals. Exide collected a groundwater sample from monitoring well MW-2 on October 14, 2015 for analysis of total and dissolved cadmium, lead, selenium and silver. Exide received the analytical results on October 26, 2015. Based on the laboratory report shared with the City of Frisco, dissolved cadmium was detected at a concentration that exceeds the Critical Surface Water PCL of 0.000256 mg/L. The City of Frisco is considering the installation of a monitoring well in a downgradient position from MW-2, as well as resampling MW-2, to evaluate the cadmium exceedance.

Considering this new information, the VCP applicants request an extension to the submission deadline for the revised APAR and RACR to March 5, 2016.

If the modified deadline is acceptable to the TCEQ, please return a written response confirming the extension for our records. If you should have any questions or comments regarding this correspondence, please contact the undersigned at 214-350-5469.

Sincerely,
Apex TITAN, Inc.

Rusty Simpson, P.G., C.P.G.
Principal
